(54) Title: WIRE-TERMINAL ELEMENT

(57) Abstract: A wire-terminal element (10) includes a terminal attachment section (12) having an engaging element (24) mechanically attached to a terminal part, a wire connecting section (14) having flat insulation-displacing elements (30) with slot connected to an electric wire, and a wire holding section (16) having first and second holding elements (36) and (40) for holding the electric wire therebetween in a manner that the electric wire is bent nearly at right angles. The wire connecting section (14) and the wire holding section (16) are arranged to be rotated relative to each other via a joint area (22).
